defendAir is designed to be a more cost effective, higher security seal & lock system than traditional methods. It is easy to implement with any existing equipment and will reduce losses and sealing costs over its lifespan.

DefendAir - Financial Benefits

- Reduces theft and losses to realise better profits
- With less product losses - more product is available to sell onboard
- Drastically reduces the costs of the supply, transport, storage and administration of disposable seals over a fraction of a defendAir seal's 10-year lifespan
- Eliminates the need and cost for additional padlocks, banding and strapping
- Depending on existing seal and lock costs, defendAir typically pays for itself within the 3rd year of use against traditional sealing methods - not even accounting for any reduction in losses
- If seal is damaged or in the unlikely event of a failure, the cart is still useable and can be sold from
- A single, reusable seal is far more environmentally sound than the continued use of thousands of disposable seals, padlocks or plastic straps
